

This half term in Jigsaw we are focusing on the topic: **Changing Me**

We will be learning that some of our characteristics come from our birth parents. We will learn that a sperm joins an egg to make this happen.

We will be able to name the internal and external body parts of males and females. We will also be able to discuss how a girl's body changes as she is older and she will have periods.

We will be talking about changes that happen to us throughout our lives and how some changes we can control and others we can't. We can discuss how we can deal with these changes.
