

Dear Parents and carers,

Please support your child in choosing *at least one* project to complete alongside the usual reading, spelling practise each week. If you would like to do any more, that would be great!

Please post any completed projects by the last week of half term. Then, the children will have a celebration day when they share the projects they have completed at home with your help.

If you have any questions, please ask your child's class teacher.

Thank you.

Project 1 – Can you design your own spacesuit? What features will it have to help you with life in space?

Project 2 – Pack your bags. You're going to space! Write a list of 10 things that you would take with you and give a reason for each object. Think carefully about all of your sounds to spell the words.

Project 3 – Draw a space scene using only 2D shapes. Can you name and label each shape?

Project 6 – Watch this video of a story being read in space! [Toys in Space- Read Aloud books for kids – YouTube](#)

What did you think of this book? Can you write a review? Why not take a trip to the local library and see if you can find any books about space to read and share?

Project 5 – Research the different constellations. Observe the night sky and make a note of what you can see. Can you see any constellations?

Project 4 – Create a painting or drawing of a space scene using materials of your choice.
