

## Finding the Odd One out

Begin with 4 objects or pictures that have a link e.g. vehicles, food or animals. Then add one more picture which does not belong e.g. four foods and one vehicle.

Ask the child which is the odd one out and how they know e.g. "Because you can't eat it". Repeat the game with the odd picture/ object not at the end of the line. Can the child still find the odd one out?

Make it more difficult – Try putting five vehicle pictures but only four have wheels, or five foods but only four are fruits.
