

Dear Parents and carers,

Please support your child in choosing *at least one* project to complete alongside the usual x3 reading, spelling and times table practise. If you would like to do any more, that would be great!

The final date to hand in the project is Monday 13th February, when the children will have a celebration day sharing the projects they have completed at home with your help.

If you have any questions, please ask your child's class teacher.

Thank you.

Project 1

Create a 3D version of one of the planets using a media of your choice.

Project 2

Imagine you were an astronaut travelling through space - write a descriptive piece about what you can see. You may like to add a drawing.

Project 3

Create a mnemonic to help someone in your class remember the planets. Draw each planet next to their letter.

Project 6

Keep a sky at night journal for a week, what can you see from your window? Can you draw and label the Moon phases and how it changes each night? Can you see any constellations? You can use the 'Sky Map' app. to name them. What time does the sun set each day?

Project 5

Create a poster or leaflet about the first person from the UK to visit space - Helen Sharman.

Project 4

Research a space craft that has been into space. Present this in any way you choose. What is the most surprising fact?
